Digital soltions in higher education

Elisa Petrucci

Head of International Projects Unit, CIMEA

TPG-LRC CoRE Seminar on digital solutions

Rome, 24 April 2024

# Survey

Questionnaire

Gain a better understanding of the recognition flows in HEIs

Structured discussion

To gather qualitative data

Focus on data management

Discussion on how data are collected, stored and shared

CIMEA

What is the situation on the ground?

1. Do yo have a centralised data management system?

Recognition workflow

- Multiple offices/departments dealing with recognition of qualifications
- The data is collected and stored in different platforms and formats

2. Is data accurate, up-to-date and coherent

Data consistency

- It may be difficult to share data due to lack of standardisation

3. Is there an archive of assessed cases

Historical perspective

- It may be difficult to use cases assessed some time ago for comparison (i.e. in case of suspicious fraud)
